

# Vacufill Coolant Exchanger

Fast economical  
servicing and cooling  
system testing

## Suitable for most vehicles

The Vacufill is a coolant exchanger and cooling system test machine. It is suitable for most vehicles with expansion tank, overflow tank or overflow pipe-based systems. Supplied with a range of adapters, the Vacufill does not require vehicle hoses to be cut or disconnected.

## Refills in seconds

Powered by compressed air, the Vacufill is fast, efficient and low cost to operate. Its built-in vacuum function tests cooling systems for leaks. Refilling systems while under vacuum, takes just a few seconds, which means no airlocks and a more successful process.

## Perfect for coolant checks

The Vacufill is perfect for annual anti-freeze checks and antifreeze replacement – recommended every five or six years.

## Test repaired systems

The Vacufill is also ideal for accident repairers. If vehicles have been fitted with new cooling parts, the system should be thoroughly tested prior to refill.

# Vacufill Coolant Exchanger

## highlights

- Vacuum pressure gauge
- Labelled control valves
- Key chart with user guide valve settings
- Refill with new coolant or re-use evacuated coolant
- Water and anti-freeze easily pre-mixed to prescribed levels
- Use with supplied Acustrip to check coolant glycol content
- Top-mounted fill tank with scale label and filter
- Waste reservoir with scale sight glass and drain tap
- No mains electrics or moving parts
- 12v pump to empty waste tank
- Rubber connection adapters and universal cone
- Swivel casters for easy manoeuvrability
- Use with supplied refractometer to test the coolant performance via temperature protection reading (Part no. 02503-0202)

## technical

Part no.	02406-0012
New coolant fill tank	11 litres
Waste/recycle reservoir	45 litres
Air requirements	6.26 bar, 90 psi
Weight	32kg
Dimensions	130cm x 49cm x 48cm
